Readme

My scene is a simple bakery / cafe with a cat that has snuck in for some pastries. I included numerous baked goods such as cupcakes, macaroons, cake, and croissants. To give more decoration and warmth, I added houseplants and succulents. Finally, I included appliances such as a stove, fridge, and microwave. I was inspired by a post by @lerkd.nft, who constructed a cafe using Blender. The main character of the scene is a cat, who is eyeing some cupcakes and macaroons.

Objects used:
Exterior (walls, floors, windows): Made by me using Blender
